DETAILED ACTION

1. Applicant's amendment, filed 02/25/05 is acknowledged.
2. Applicant's election with traverse of group IX, claim 25, now claims 26-30 in the reply filed on 02/25/05 is acknowledged.

Applicant traverse the Restriction Requirement on the grounds that the search of Groups I-IX together would not constitute a serious search burden on the examiner and that search of the claims of Group IX would provide useful information for the claims of other Groups

This is not found persuasive because the MPEP 803 (August 2001) states that "For purposes of the initial requirement, a serious burden on the examiner may be prima facie shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search". The Restriction Requirement enunciated in the previous Office Action meets this criteria and therefore establishes that serious burden is placed on the examiner by the examination of more than one Group. The Inventions are distinct for reasons elaborated in paragraphs 3-5 of the previous Office Action and above

The requirement is still deemed proper and is therefore made FINAL.

EXAMINER'S AMENDMENT

3. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.
4. Authorization for this Examiner's Amendment was given in a telephone interview with Doyle A Siever on 4/26/05.

In the Claims:

5. Claims 1, 14, 16, 17, 18, 20, 21 and 23 have been canceled.

Art Unit: 1644

6. In claim 26 , the phrase “ (b) detecting the Cathepsin O protein in the biological sample ” has been replaced with -- (b) wherein the binding of said antibody to said protein is indicative of the presence of Cathepsin O in a biological sample --.

7. Claims 26 –30 are pending and allowed.

The prior art does not teach or suggest a method of detecting Cathepsin O protein in a biological sample as recited in claims 26-30.
